

Summary CV

Dr Niculae is the founder of one of the premier laser and cosmetic dermatology treatment, research and training centers in Romania called LASERMED, established in 1994.

Lasermed is a state-of-the-art facility using the most advanced laser and cosmetic dermatology approaches available for the treatment of cosmetic and medical skin issues. Adults, children and infants come from around the world for treatment of conditions ranging from scar removal to cosmetic rejuvenation. The center is recognized both nationally and internationally for its leadership role in the area of skin laser technology.

Bogdan Dimitrie Niculae, M.D., the director of the center, has been practicing state-of-the-art laser therapy since 1993.

Much of the early work on of aged and wrinkled skin, skin rejuvenation, new botulinum toxins, wrinkle fillers and removal of unwanted hair was pioneered at the facility. Throughout the years

Dr. Niculae, have been nominated as the leading authority in dermatological lasers in Romania. He was elected by 26 countries as Vice-president of European Association of Anti-aging Medicine, also Dr. Niculae is the President Of Romanian Association of Anti-aging Medicine (AMAA). Trough AMAA he organized and lectured 7 Romanian International Congresses on Anti-aging medicine and also the first European funded program for doctors in the field of medical lasers called "SPIRALMED".

Member at Harvard Medical School Postgraduate Association,

attends various courses, each year, on dermatology, laser surgery and skin surgery. He is an international speaker for American Academy of Anti-aging Medicine, European Society of Anti -Aging Medicine, Euromedicom.

Dr. Niculae continues to break new ground in laser technology and all aspects of cosmetic dermatology, providing cutting edge treatments to the center's patients.

Dr. Niculae has personally selected and trained a numerous group of physicians (over 400) in the use of laser technology and other aesthetic medical procedures starting with 1994 and continues also in present day to organize courses on lasers, fillers, botox and aesthetic workshops for the Romanian doctors.
